

THE GILCHRIST CENTER FOR HOSPICE CARE

GREATER BALTIMORE MEDICAL CENTER
BALTIMORE, MARYLAND

Marks, Thomas Architects was uniquely qualified for the Gilchrist Center for Hospice Care at the Greater Baltimore Medical Center's renovation having originally designed the center. The 11,500 SF renovation consisted of re-purposing administrative offices into a new patient wing including 10 patient rooms, physician's offices, lobby, family lounge and nourishment kitchen, nurse's station, med room, commercial kitchen and charting area. It was designed with family comfort in mind, creating warm, cozy environments that are flexible to meet the needs of the many families it serves.

The Gilchrist Center has been recognized with numerous design awards, including an AIA Design Award, a National Association of Home Builders (NAHB) Award, and was named "Best Medical Facility".
